Szkoła Podstawowa Edujoy
Annual Sustainability Report
2026

Introduction

Sustainability has become an essential part of modern education, shaping not only knowledge but also attitudes and everyday habits. At Szkoła Podstawowa Edujoy, environmental responsibility is integrated into school life, encouraging students to understand their impact on the planet and take meaningful action.

This Annual Sustainability Report highlights the school's efforts over the past year in promoting eco-friendly practices and building a culture of environmental awareness. Through initiatives such as Eco Clubs, improved recycling systems, responsible waste management, and activities supporting biodiversity, the school community has worked together to create a more sustainable environment.

The report reflects both the progress made and the ongoing commitment of students, teachers, and staff to protect natural resources and inspire positive change for the future.

Eco Clubs at Szkoła Podstawowa Edujoy

The Eco Clubs at Szkoła Podstawowa Edujoy is a key part of the school's sustainability efforts, bringing together students who are interested in protecting the environment and promoting eco-friendly habits. The club provides a space where students can actively participate in planning and leading environmental activities within the school.

Members of the Eco Clubs take part in organizing campaigns and events such as Making hearts with toilet rolls ,recycling drives, waste sorting awareness activities, and environmental workshops for younger students. They also support daily sustainability practices by helping monitor recycling stations and encouraging their peers to reduce waste and use reusable materials.

Through hands-on projects like gardening, creating insect houses, and preparing initiatives such as the Eco Fashion Show, students develop practical skills and a deeper understanding of environmental issues. The Eco Clubs also helps build leadership and teamwork, as students work together to make a positive impact on their school community.

Overall, the Eco Club empowers students to take responsibility for the environment and inspires others to adopt more sustainable behaviors in their everyday lives.

Making Hearts with Toilet Rolls

During Eco Club sessions at Szkoła Podstawowa Edujoy, students took part in creative recycling activities that showed how everyday waste can be reused in meaningful ways. One of the most popular projects was making decorative hearts from empty toilet paper rolls.

Instead of throwing the rolls away, students reshaped them into heart forms and decorated them using paints, markers, and other recycled materials. This simple activity helped students understand the value of reusing materials and reducing waste, while also encouraging creativity and teamwork.

The project demonstrated that even small, seemingly useless items can be transformed into something creative and useful, reinforcing the idea that sustainability can be both practical and fun.

Gardening and Learning About Soil and Plants

During Eco Club sessions at Szkoła Podstawowa Edujoy, students regularly take part in gardening activities that combine practical work with environmental learning. By working in the school garden, students gain hands-on experience in planting, watering, and caring for different types of plants.

An important part of these activities is learning about soil. Students explore different types of soil, understand its role in plant growth, and learn how nutrients, water, and sunlight affect healthy development. They also discover how composting improves soil quality and supports sustainable gardening.

Waste Management

We focused on the important topic of waste management. We learned about different types of waste, such as biodegradable and non-biodegradable materials, and discussed how improper waste disposal harms the environment. Through these lessons, we understood the importance of reducing, reusing, and recycling in our daily lives.

Visit to Centrum Ecological Department

Recently, children visited the Centrum Ecological Department, where they learned about protecting the environment. They took part in fun activities like recycling and exploring nature. The visit was both educational and enjoyable, inspiring them to care more about the planet.

Eco Fashion Show

We recently explored eco fashion with kids by reusing old clothes and turning them into new items like bags and accessories. It was a fun, hands-on activity that taught them about sustainability while encouraging creativity. The kids enjoyed designing their own pieces and started thinking more about how their choices impact the environment.

Eco Clothing

Recently in our school, we initiated an eco-clothing activity with kids, where we reused old clothes to create something new. The children turned T-shirts and fabric scraps into bags and simple accessories. It was a fun, creative project that also helped them understand the importance of caring for the environment.

Home for Insects

We made an insect home with kids, and it was a fun and educational activity. Using natural materials like sticks, leaves, and small pieces of wood, the children built a safe place for insects to live. They learned why insects are important for the environment and how we can help protect them. It was a creative project that also encouraged teamwork and care for nature.

Life Cycle of Butterfly

Kids learned about the life cycle of a butterfly and the importance of nature. They explored how a butterfly grows from an egg to a caterpillar, then forms a chrysalis, and finally becomes a butterfly. This helped them understand how living things change and grow. They also learned why nature is important and how we can take care of it

Recycling

Kids made creative art projects using recycled carton boxes. They turned simple materials into fun designs like houses, animals, and decorations. This activity encouraged imagination while teaching the importance of recycling and caring for the environment.

New Life for Toys

During Earth Day activities, students at our school brought old toys and gave them a new life. Instead of throwing toys away, students reused, repaired, and shared them with others. This activity helped reduce waste and taught us the importance of recycling and caring for our planet. Everyone enjoyed taking part and learning how small actions can make a big difference for the Earth.

Selling Herbs at Our School

During Earth Day, students at our school sold herbs to promote a healthy and eco-friendly lifestyle. We offered different kinds of fresh herbs such as mint, basil, and parsley. The activity taught us about the importance of plants and how they help protect the

environment. Students and teachers enjoyed supporting our project, and it was a fun way to celebrate Earth Day while learning about nature and sustainability.
